How often have you noticed the numbers 11:11, 12:12, 10:10, 22:22, 12:34, 2:22, 3:33, 4:44 or 5:55 popping up all over the place? These number sequences are not necessarily only time prompts. They can also be number sequences, like 333, 1111 etc. To your mind, is this a coincidence, or are they too frequent to be random? Perhaps you are puzzled or amused by this phenomenon? Possibly even a little bit nervous? The question everyone is asking is "What does 11:11 mean?" and "Is there a reason for this?" And there certainly is.

Millions of folks all around the world are now seeing these amazing 11:11 prompts. They are folks of all colours, all religions, all beliefs. It's spreading, and becoming far more common; it's become a major phenomenon. Someone or something is causing all these folks to look at clocks, number plates, phone numbers or any source of numbers even when they make no effort themselves to look for these things. You can even change your clocks in the house, and you will still be prompted, at the "wrong" time. You can't stop it, because YOU aren't doing it. Sometimes you will even see these numbers flashing after a power outage, even though digital clocks are supposed to reset to 12:00, not 11:11 or 12:12!

These 11:11 Wake-Up Calls on your digital clocks, mobile phones, VCR's and microwaves are the "trademark" prompts of a group of just 1,111 fun-loving Spirit Guardians, or Angels, and the 11:11 prompt is their way of using our innate ability for pattern recognition to let us know that they are here. Once they have your attention, they will use other digits, like 12:34, or 2:22 to remind you of their presence. Invisible to our eyes, they are very real.

Our earthly 1,111 Spirit Guardians, often called "Midwayers," have been assisting folks of all walks of life for many centuries. George Barnard, the original human member of the 11:11 Progress Group, has been privileged to call them his family, his coworkers, friends and teachers for almost 60 years. Get an introduction into some of George's experiences in "From the Desk of George Barnard".

Some folks also notice lights going out or on when they pass by, such as street lights. They may also hear the door bell ring, yet there is no one in sight. It's all due to our fun loving midway friends. They will use almost any electrically controlled device to get your attention. They can and will change traffic lights, but we have found that often damages the electronic circuits, so we don't suggest you ask for that.

Sign up for the 11:11 Email Mailing List to receive the beautiful uplifting messages from various types of Celestial Beings. Members of the 11:11 Progress Group receive these communications on an almost daily basis. The new ones are sent to the email list, and posted on our message board. Some of the past messages are found in the Celestial Message pages and on our sister sites. Also, you can go to our 11:11 Message Board site to connect with other 11'ers, and share your experiences. This message board has many stories about the wonderful Akashic Construct process and the successes folks have had with this. There is even a specific 11:11 site dealing with the Akashic Construct, a CD that is revolutionizing how people make contact with their guides.

A new age of "Spiritual Uplift" has begun on our planet. There are now literally billions of Celestial beings here, all of whom have been especially trained to assist with changing the course of this planet. Many more of these delightful Spirit Guardians are now ready to assist whoever will ask for their help. As a tribute to the centuries-long tenure of the original 1,111 Celestial Helpers, they have retained the customary 11:11 prompts. We are told that well over a million folks are being given these 11:11 prompts, and a glance around the web will tell you something big is happening. Welcome to being an 11'er.
