Illawarra District, Australia, November 23, 2009.

Midwayer Chief Bzutu (ABC-22).

Subject: "Friendship, Fun, And The Task"; Received by George Barnard. Bzutu: "In time, human memory fades, not like that of the Midwayer, who 'chalks up' all spiritual, practical and technical information in his steel-trap mind. The human right here, whom I call, and vouch for, to be one of our closest friends, does not always think back to the early days of us meeting up. These days, he seems to forever have his mind set on the future, a better world, a more spiritual world, and better interspecies communication. There was another time.

"Decades ago, it was the human who chanced to penetrate the Midway Realms where we live, and find Sharmon, Andrea, and me. We were the ones to be greatly surprised with this achievement, the human hardly blinked an eye.

Soon we were advised by him that we were mere ghosts, seemingly devoid of a sense of humor, lost on the wrong continent, and the sooner we collected a bus-load of our kind and get ourselves shipped off to heaven, the better it would be for us. "We needed Machiventa's input regarding what to do with this human, who could see us so well, had trouble hearing us, and would then send us on our way with an entirely different mission from what we wanted him to complete. Meeting after meeting was held with the Prince Melchizedek for us to be assured all would go well in time, and the businessman would learn to hear us better, fall in line with the program, and become an asset. Machiventa had faith, we at one time ignored being fired from our jobs by the human, but eventually our all-important friendship blossomed, and 'the loss of our jobs' is now considered in fun. "Look at it now! There are many

hundreds of informed humans all over the globe that are drawn into an association with those of our Midway Realms and even into further realms beyond. It is an achievement largely created by the 11:11 Progress Group, and our numbers have swelled to approach 200.000 of the most capable Midwayers in the sector to handle the needs of this troubled world. "On top of that, and in line with Michael's redemption mandates for the planet of His human sojourn, there be no limit to satisfying the worthy spiritual request, and many more of the system's Midwayer Teachers and Helpers would gladly give their eye teeth to serve on this world — the big draw card in the Nebadon local universe. In the mid-nineties the human told me, 'I'm documenting what we all did. No human rookie helper of the 11:11 should ever have to go through all this darned confusion. If just one person finds my writings, and establishes a good working relationship with you guys, our literary efforts will not have been in vain.' Look at it now, and smile. "Occasionally it pays all of us to momentarily consider our tenuous 'para-

psychological' past, before we once again look ahead to the future, a better world, a more spiritual world, and the long-awaited science of vastly improved interspecies communication. I am Midwayer Chief ABC-22 at your service. Au revoir." George: "Thank you Brother." © The 11:11 Progress Group.
